Co Mayo

Dear Sir/Madam

As Chairman of E.L.C.R.A, I would like to Voice our support for the proposed PHES project at Glinsk In North Mayo.

We are a group of fishermen who fish off the north mayo coast and are actively involved in measures to conserve and re-stock the native lobster stocks in the hope that we can have a sustainable future in inshore fishing well into the future.

We will welcome any development in our area that is environmentally friendly and look forward to cooperating with the project in the years ahead.

We would also support improvements to local harbours and amenities as part of the project and would expect that any such works would be undertaken in consultation with local fishing interests.

Yours Sincerely

William Walker
Chairman...
