To Whom It May Concern

RE : PROPOSED HYDRO DAM DEVELOPMENT & ASSOCIATED WORKS
AT PORTURLIN PIER.

Cumann Iascairí Chois Costa Iorrais Teo (Erris Inshore Fishermen's Association) is based in Erris, North Mayo. The organisation has 45-50 members, who are all registered fishing boat owners and fish in the local area off the Mayo coast.

A member of the Association approached the committee regarding the proposed development of a hydro dam along the cliff face north of Porturlin at Glinsk and also the proposed work at the pier in Porturlin. We raised this issue at a full meeting of the association last week. Piaras O Donnell from Porturlin explain the outline of the proposed scheme and displayed corresponding drawings and plans of the intended development. Following a discussion at the meeting, the fishermen were unanimous in their support of the development.

If our association can be of any assistance in bringing the project to fruition or providing any confirmation of additional support, please do not hesitate to contact me.

Yours faithfully

EAMON DIXON
Secretary
