20th December 2010

Dear Maurice,

In response to your request for information regarding EirGrid's plans, I can tell you that EirGrid is planning the development of new transmission infrastructure in Mayo and neighbouring counties to facilitate regional development and the connection to the grid of new large-scale renewable generation in north west Mayo. Our current plans involve, in the first instance, construction of a 400 kV sub-station near to the existing Bellacorick 110 kV station, and a high capacity 400 kV overhead line to either Flagford or Cashla 220 kV sub-stations. It is planned to have this infrastructure in place by 2020. Depending on the level of further growth in generation in north-west Mayo, EirGrid has plans for the construction of a second overhead line, thus completing a Cashla-Bellacorick-Flagford loop.

I trust this meets your requirements.

Yours Sincerely,

A handwritten signature in blue ink that reads "Louis Fisher".
